

First Game Project

Lyric Karaoke: By - Alex Mazilu

Objective - get users typing faster

To create a game that helps users improve typing skills while listening to music, and typing lyrics faster and more accurately than opponents. Points scored for accuracy.

Know your memes - History of the Rick Roll

Rickrolling, alternatively **rick-rolling**, is a [prank](#) and an [Internet meme](#) involving an unexpected appearance of the music video for the 1987 [Rick Astley](#) song "[Never Gonna Give You Up](#)". The meme is a type of [bait and switch](#) using a disguised [hyperlink](#). Those led to the music video believing that they were accessing some unrelated material are said to have been *rickrolled*.^[1] The trend has extended to disruptive or humorous appearances of the song in other situations, such as a live appearance of Astley himself in the 2008 [Macy's Thanksgiving Day Parade](#) in New York.^[2] In May 2008,^[6] the practice had spread beyond 4chan and became an Internet phenomenon,^[7] eventually attracting coverage in the mainstream media.^[8] An April 2008 poll by [SurveyUSA](#) estimated that at least 18 million American adults had been rickrolled.^[9] In September 2009, [Wired](#) magazine published a guide to modern hoaxes which listed rickrolling as one of the better known beginner-level hoaxes, alongside the [fake e-mail chain letter](#).^[10] The term has been extended to simple hidden use of the song's lyrics.

According to [The Register](#), as of 2010, Astley had only directly received \$12 in [performance royalties](#) from YouTube. Although by that time the song had been played 39 million times, Astley did not compose the song and received only a performer's share of the sound recording copyright.^[23]

Problems - Lyrics in sync, disabling certain keys.

```
// window.onkeydown = function (event) {  
//     if (event.keyCode === 32) {  
//         event.preventDefault();  
//     }  
//     if (event.keyCode === 13 ) {  
//         event.preventDefault();  
//         key.disabled;  
//         keyPress.disabled;  
//     }  
//     if (event.keyCode === 16);  
//         event.preventDefault();  
//         event.disabled();  
//         event.keyPress.disabled;  
//     }  
// }
```
